

**From the Desk of the chief editor.**

Dear Readers/Authors,

It gives me tremendous delight to present PESQUISA, a peer reviewed Multidisciplinary International Journal which contains exciting and thought provoking collection of articles, essays and research papers. The multi-disciplinary and integrative approach to be both stimulating and instructive.

India is quick climbing the esteem chain in all fields of research, scientific, financial, software, medical, biotechnology, social science, literature, etc. Advanced education and research should be upgraded and re-defined on the basis of the turbulent changes in the global culture and market economy. So that India can compete with internationally acclaimed educational institutions and in the meantime empower all segments of the general public to get to advanced education. In this shifting scenario of ideas and perspectives in education, the role and obligation of Pavanatma is gravely important and needs to diversify its intellectual quest. The College endeavours to accomplish these objectives consolidating scholastics from different quarters of scholarship and it is breaking barriers and moving forward confidently.

We remain extremely appreciative to all who have enriched this edition through their scholarly contributions and remarks. We hope our endeavour is a memorabilia of potential to strive against all odds in pursuit of excellence.

With Regards,

Dr. Johnson V
